

Appl. No. : 10/829,631
Filed : April 22, 2004

AMENDMENTS TO THE SPECIFICATION

Please amend the following paragraphs as shown:

[0001] This application is a continuation of U.S. Application No. 10/266,040, filed October 7, 2005 2002, now U.S. Patent No. 6,820,669, issued November 23, 2004, which is incorporated herein by reference for all that is discloses.

[0050] As shown in FIGURE 11, the inboard bead 104 is intended to correspond to the height of the inboard lip 68, and is similar in shape and size to the inboard bead 50 of a typical tire of the prior art (see FIGURE 5). Any words 130 written on the outboard tire wall 92 are preferably positioned above the flange seat 109 so that such words 130 are fully visible after the wheel 60 has been mounted within the tire 90 and the outer flange 66 covers up substantially all of the flange seat 109.
